9th Central European Conference 2017

Fibre - Grade Polymers, Chemical Fibres
and Special Textiles

September 14th 2017, Liberec, Czech Republic

International Ph.D. Students Day

Dear students,

presentation of your dissertation results is a part of fulfillment of study duties in doctoral study program realized by FT TUL, especially of students in full-time form and in the second or higher year of study. Because FT TUL is organizing international textile conference 9th Central European Conference (CEC) on "Fiber-grade Polymers, Chemical Fibers and Special Textiles" this year (during 11-13th September 2017), take the opportunity to present your results there.

Based on the final amount of conference participants, special student sections will be created during conference days or the day after conference closing. Therefore book these days (11th– 14th of September) for fulfilling your study duties.

Due to reasons mentioned above, special workshop for Ph.D. students held out of Liberec will not be organized this year.

You can find more details about the conference here: <http://cec2017.ft.tul.cz/>
The registration can be done by submission a full paper (4-5 pages) using full text template and full text submission system (see conference web page) till 15th of July 2017. Best papers will be submitted to Vlakna a textil journal (Scopus indexed). The number of participants is limited and therefore the early bird registration is recommended. The presentation of SGS projects will be preferred.

Students, who can not participate on this event for objective reasons, will present their work at alternative date, which will be published in September.

If you have any other question related to this event, please contact Veronika Tunakova via email (veronika.tunakova@tul.cz).

Best regards

Ing. Gabriela Krupincová, Ph.D., doc. Ing. Maroš Tunák, Ph.D.
